SPH versus ODE tilt angle, same plate and release angle (SPH covers only the part before the dotted line)
Fluttering case, $I^* = 0.68$
Tumbling case, $I^* = 1.35$
Tilt angle θ [deg]
Time [s]
2D ODE
2D SPH (run length 0.50 s)
2D SPH-FSI and 2D quasi-steady ODE, measured data
